## DIWALI MELA

Modern School, Barakhamba Road held its annual Diwali Mela on 7th November, 2015. The mela had numerous games and food stalls. The clubs of the school had also put up stalls selling knick knacks and jackets.

An Inter-House music competition was organised. Many students took part and enthusiastically displayed their talent. The judges were Ms. Alka Luthra, Mr. Vikram, Mr. Raees Ahmed and Ms. Baisakhi Samajdar. Our principal Dr. Vijay Datta announced the winners. Pratap House secured the first position, Ashoka House and Tagore House secured the second and third positions respectively

*Students at the N.P.L visit*

## N.P.L Visit

On 30<sup>th</sup> September 2015, the students of Modern School, Barakhamba Road attended **NPL Open Day 2015** held at National Physics Laboratory, Pusa Road. There were several projects on display, such as electromagnetic conductors, the formation of objects using hard plastic fiber, a gas chamber to separate several gases and a glimpse of semiconductor electronics. These projects helped to inculcate a scientific fervor in students. They also observed a section on the working of biosensors, which primarily focused on the development of sensors for cholesterol measurement. In the field quantum phenomena, they saw a demonstration on gold and silver nanoparticles, which helped them to understand the properties of subatomic particles. These demonstrations were quite enlightening and interesting.

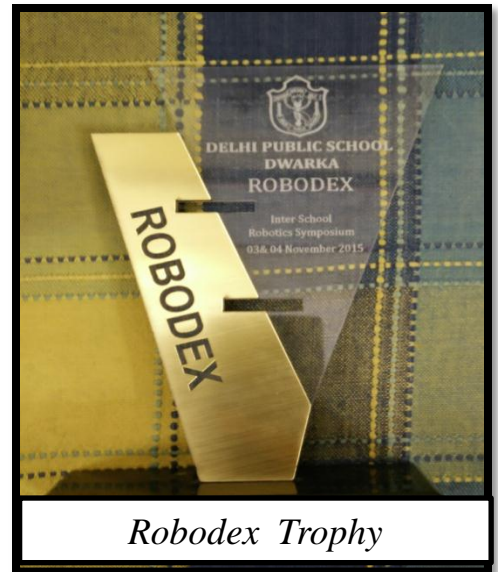

## RoboDex 2015

RoboDex 2015 was held at Delhi Public School, Dwarka on 3rd and 4th November, 2015. Tushar Goswamy of class S6-D and Hrithik Bansal of class S5-F secured the 1st runners up position in the Robotics Quiz.

## Dhananjay Mohan Competition

Dhananjay Mohan Science Competition

On 10<sup>th</sup> November, 2015 2 students of Modern School, Barakhamba Road participated in the Annual Dhananjay Mohan Science Competition held at Amity School, Noida. Dakshayan Varshney and Anav Chopra of class S6-D secured the 3<sup>rd</sup> position in the project display sub category. Their project was based on 'Hydrocyclones'. The students created an artificial whirlpool and placed a turbine in the air core of the vortex. This method was analogous to the working of a dam, with the advantage of countering all the harmful and ill effects on the economy, population and marine life caused by dams.
