EQUESTRIAN AT MODERN

“There is something about the outside of a horse that is good for the inside of a man.”

Equestrianism, more commonly known as horse riding or horseback riding, is a royal, historic and rare sport. This sport is based on a unique bond between the rider and his teammate - the horse. Together they compete and train in a variety of disciplines. A sport which is not meant for the faint hearted, requires courage and compassion to take part in carrying forward the ancient bond which signifies a harmonious evolution.

Horse riding inculcates attributes of discipline, bravery, forgiveness and most importantly compassion. These fundamental values are ingrained in each rider. Controlling and maneuvering of a 1200-pound animal is unexplainable and truly a great experience.

Horse-riding is back in the Modern School's sporting fold after a gap of 32 years. A new riding arena has been created for the said purpose. Thorough bred horses have given credence to horsemanship in students. Horses teach us to make friends as they can teach us to be more understanding and look at other's

TALENTED HORSE RIDERS

viewpoints in an unbiased manner. It is the aura of unconditional love and acceptance that a horse exudes.

Modern School is home to the following horses:

Majala- A dark bay mare, with a very friendly nature who loves to train aspiring students in their initial years.

Rajni- A bay mare: not the biggest horse but has the biggest heart, super easy to ride with jumping as her favourite time pass.

Kathlyne- A bay mare, who stands tall and proud. A dressage horse by discipline but the most trainable horse, preferred by moderately experienced riders.

Nike- A recent addition to the team with a specialization in jumping and tent pegging. She's a moody one and loves her carrots.

Ashi- A bay mare, who loves children and young students wishing to learn the beautiful sport. She's also a trained tent pegging horse.

Trazo- A gelding with a chestnut, a very calm personality and is ridden and loved by all.

Dance- A dark bay mare with a proud tall built, she's the jumper of our team, a horse preferred to be ridden by experienced riders.

Silver - A chestnut gelding, he's an ex racehorse who is the newest to the team. He is being trained on the Modern School grounds.

SCIENCE PARK

Science is an integral part of our every day life and is essential for a child's holistic development . A Science Park was set up in Modern

School and was inaugurated on 9th November 2014 by Vice Admiral Sunil Lanba, AVSM. It features structures displaying various scientific laws and principles relating to concepts like Angular Momentum, a Square Wheel Cycle, which can roll smoothly keeping the axle moving in a straight line, a Crystal Structure with an array of atoms arranged at uniform

intervals and the Vortex where water rotates faster at the periphery rather than at the centre. Newton's Disc beautifully depicts that white light consists of seven colours. Also known as the Disappearing Colour Disc, it is a well-known physics experiment with a rotating disc with segments in different colours appearing white when it spins very fast. This type of light stimuli is called Temporal Optical Mixing. Most iconic of all biological molecules, the double helix DNA is a delight to watch. Science Park is an area managed in a manner, designed to promote innovation and foster a scientific mindset.

B.A.L.A. (Building As a Learning Aid)

BALA (Building as Learning Aid) is an innovative concept towards qualitative improvement in education, through developing child-friendly, learning and fun based physical environment building in school infrastructure. Modern School with its illustrious lineage believes in this concept and every nook and corner exudes knowledge in its myriad forms. It is an initiative to

**BUILDING AS A LEARNING AID**

holistically plan and use the School infrastructure constructively. It incorporates the ideas of activity-based learning, child friendliness and inclusive education for children with special needs.
