'Learning never stops'. The current global pandemic was no deterrent to teach and learn for us at Modern School. Learning different skills continued during the summer holidays. Although traditional summer camps were out of the question this year, there were plenty of virtual options. Post May 15th 2020, the school began with the summer vacation and switched over to the summer programmes in Sports and Creative activities. Virtual Summer Camps for students were organized in sports and creative activities from Monday, 18th May, 2020. For conducting these Camps, channels were created on the Microsoft Teams Platform.

These sessions offered a wide variety of enrichment to keep the children engaged, learning and having fun while practicing safe social distancing. For the academic enrichment of the students, the "Need-based Extra Classes" for class X and XII were also held from Monday, 18th May 2020.

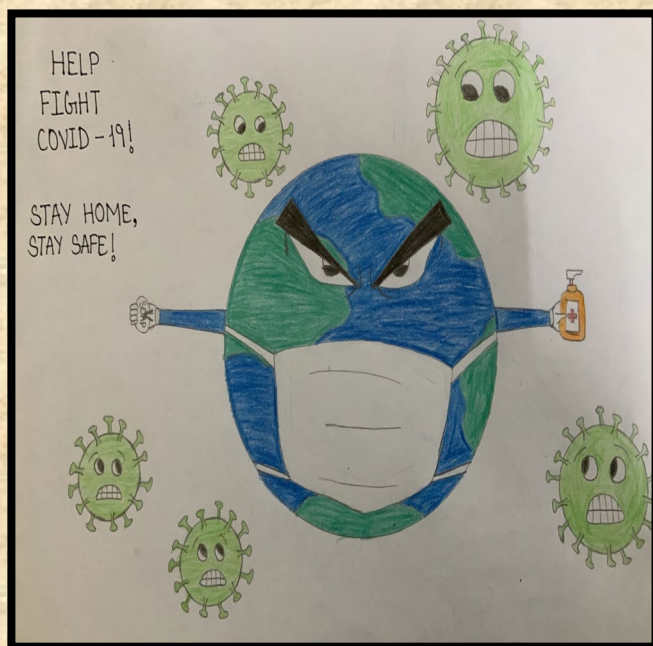

PAINTINGS BY MODERNITES

Painting is a play of creativity and self expression with colors and shapes. It's an art of creating something new from the depths of heart. Paintings express the inner experiences and are reflective of the world outside. During the period when the students were confined to the safe environment of their homes, young modernites beautifully expressed their emotions on the canvas.

POETIC CREATIONS BY THE STUDENTS DURING THE LOCKDOWN PERIOD

The following poems are the Poetic Outpourings from young minds at Modern School.

TIME

One thing I reckon today
Is changing old world away.
It's power is exceptional and completely out of control
These are salient qualities of time leading to new era as whole

People who manage time and work accordingly are experts
But it requires sole dedication and limitless efforts
They cannot beat time or go ahead
Cause it's powers are in all directions spread
Things for old by time and maybe faster if they don't value it
For this not to happen, don't let your hard work quit

Time gives an opportunity for varies new things to come up
But will and strength are must required for this setup

Without understanding its nature nobody can be successful
If u can't accept the challenge then u have quite a weight to pull

NIGHT

Nowadays, I fear the most at a time
When frequently happens crime
Be aware of this strong night
It has small things which make me fright

It always takes the brightness away
And ends a happy going day.
But every darkness has a positive side
One can find it's true self and stand in veranda in pride

Small bits of enjoyment can also be found in twinkling stars,
Watching moon soothes my heart with disturbance of less cars
Mix emotions always arise in my mind
This unique stance is very difficult to find.

CHANGE

We need to change.

Courage, strength and determination are needed,

To come out of this phase, very strange.

In our houses,

We're trapped in a cage.

What we have to do is rearrange,

Rearrange our lives in a different way.

Thanking the people, helping backstage.

And enjoy our life, teenage

We need to change.

We need to be quiet,

We need to be patient,

We must not riot.

And overcome this age of terror,

By correcting this terrible error.

It's not a reason to moan,

But one to recheck the way we have grown.

To end this whole downrange,

We need to change.

The world will change.

It will change for good.

But mind you,

Not any and everyone could

We need to have courage, strength and determination,

It will happen by our positive imagination.

To change this negative into a positive page

We will change

DIY MASKS MADE BY THE STUDENTS DURING THE LOCKDOWN PERIOD

Students of Modern School put their creativity into action by making DIY masks as protection from the Covid-19 virus. They created colourful masks in various designs to keep the virus away.
