New Delhi-25. M-+919911775711

STRUCTURAL STABILITY CERTIFICATE

I, Adeeb Beg, Structural Engineer on the request of **Modern School, Barakhamba Road, New Delhi – 110001** structurally audited Modern School Buildings.

During the inspection, I found that Modern School Buildings appears to be sound from external and internal defects. Visual inspection, non-destructive/ destructive test results and structural analysis shows that buildings were built with a good constructional practice and all its members are still intact to its original positions.

Modern School buildings don't show any visible distress like cracks, spalls, crazing, seepage, tilt, deflection beyond permissible limit etc. Also non-destructive test results show a good concrete grade. No concrete disintegration is found anywhere in structures as per testing results and no rusting of steel is found. The demand to capacity ratio results are also holds well enough upon analysis. A retrofitting is also done in "Main Block Building" to make it seismic resistant. These buildings are well maintained structurally to make it long lasting and durable.

Therefore it can be easily inferred from observations/ test results & analysis that Modern School Buildings are well maintained stable structures and sound resistant to external forces of wind & earthquake. Modern School Buildings confirms to the requirements of relevant Indian Standard Codes- IS: 456-2000, IS: 1893(Part 1)-2016 and National Building Code-2016 in respect of 'structural safety and serviceability' in general and natural hazards including earthquake in particular. Buildings are serviceable for their designed intended life.

The Modern School would do well to get technically re- assessed all structures after maximum 5 years or whenever required for structural safety, it then so counseled.
